*Detailed Action*

This is the second Office Action corresponding to amendment filed Sep 3, 2004. Claims 1, 2, and 4-15 are active in the application. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

*Drawings*

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. **The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures.** If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 11 and are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 11 depends from cancelled claim 3.

***Claim Rejections - 35 USC § 102***

Claims 1, 4, 5 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by British Patent No 2,226,705.

The British patent shows at Fig 1, an antenna support comprising a pole (2) a base (1), coarsely adjustable support (3,5), finely adjustable support (7) and an actuator (10, 12) connecting the two support members. The coarsely support pivots relative to the base along a first axis defined by element 4, and the finely adjustable support pivots relative to coarsely support along a second axis defined by element 9; wherein both axes are in parallel orientation.

***Response to Amendment***

The examiner wants to apologize for erroneously indicated that claim 3 contained allowable subject matter. For some inexplicable reason, the examiner read claim 3 as depending from claim 2.

*Allowable Subject Matter*

Claims 2, 6-10, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
